I'm working on some slides (a mix of exisitng LWG and EPA issue) for you to start from. I suggest that we set the four of you up as a panel and tag team the information and provide EPA, LWG and city perspectives.. I'll facilitate to make sure we can move through the material in the hour timeframe. The two main topics are key findings from the RI and the next steps in the FS. I suspect this will be a mixed audience in terms of project knowledge, so we will need to provide a couple minutes of general background to start off with.

So, has anyone worked on getting ready for this. I think we should talk since this is happening on Tuesday.

Eric
